Experience

September 2023 - Present

Digital Innovation Engineer • Torbay & South Devon NHS
Foundation Trust

- Led the architecture and delivery of multiple innovation initiatives within the EPIC (FHIR R4) ecosystem, supporting the OneDevon integrated care system.
- Designed and deployed machine learning models addressing both clinical and operational challenges, including long-term health outcome prediction and acute appointment attendance forecasting.
- Developed production-ready user facing solutions embedded in the MS365/Power Platforms environment
- Actively contributed to local NHS policy development on the ethical and safe use of AI and machine learning in clinical environments.
- Acted as a technical lead and mentor, managing assistants and T-Level placements, including capability development and supervision of externally sponsored projects.
- Collaborated with senior clinical, operational, and digital stakeholders to translate organisational needs into technically viable solutions.
- Developed cloud systems within Azure, AWS and OVHCloud.

November 2025 - Present

Data Analyst • University Of Plymouth

- Analysed HESA and institutional datasets using Python to support financial planning, performance analysis, and executive decision-making.
- Produced executive-level briefings and board-ready presentations, translating complex datasets into concise strategic insights.
- Designed and maintained Power BI dashboards using DAX, enabling dynamic financial and operational performance monitoring.
- Automated data pipelines and reporting workflows, significantly improving data quality and reporting efficiency.

More on next page.

December 2024 - January 2026

Studio Lead • Giant Enemy Crab

- Led the operation and technical direction of an independent game studio, overseeing development, production, and delivery of Due Process.
- Managed engineering and production efforts contributing to over 250,000 game copies sold in a single calendar year.
- Provided hands-on technical contribution in C# and Unity, alongside studio-level leadership and coordination.

September 2021 – September 2023

Full Stack Engineer • Smart Crafts Supplies Ltd

- Solely responsible for full-stack development and maintenance of core web services for a local eCommerce business.
- Delivered end-to-end solutions covering backend services, frontend functionality, and operational support.
